

KOZY COATS water filled teepees

Congratulations for choosing the original Kozy Coats®, reusable water filled teepees. You'll be rewarded with an early season of delicious tomatoes, cucumbers, melons and other heat loving plants.

Directions for use

Open tubes and add water.

Place over top of plant.

Enjoy an early growing season.

Tips for use

1. Fill the plastic tubes on the Kozy Coat with water. An easy way to do this is to place the Kozy Coat around a pail so that it stands up straight.

2. Position the Kozy Coat in your garden over your plant. Adjust the Kozy Coat into a teepee shape by making the bottom as wide as possible and gently squeeze the top together. If the garden soil is still cold (or even frozen!), place your Kozy Coat on the soil for a week to 10 days. When the ground has been warmed, remove the Kozy Coat and set your plant in the ground. Reposition the Kozy Coat over your plant.

3. When the weather is reliably warm (mid to late June), remove the Kozy Coat and store for reuse next season. Some gardeners in regions with moderate climate prefer to leave Kozy Coats® on all summer. Peppers and eggplants are heat-loving plants that will do best throughout the summer with a Kozy Coat.

The earlier you plant, the earlier you'll be picking. You don't have to worry about the heavy frost or late blizzards. Kozy Coats® will protect your plants through the worst spring weather. Even if the water in the Kozy Coat turns to ice, your plant is still protected. The Kozy Coat becomes an igloo, keeping in heat and warmth around your plants.
