

GROWER'S FACTS

W.H.PERRON 

Wild holly

Nemopanthus mucronatus

PLANTATION: Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 to 90 days. Sow seeds wherever desired as soon as the soil gets warm enough.

SOIL: cool, moist or water soaked

CULTURALS PRACTICES: Or plant the seeds outdoors during the fall. Germination will occur after 2 winter periods (18 to 20 months).
