

# GROWER'S FACTS

W.H.PERRON 

## Joe-Pye-weed

---

*Eupatorium maculatum*

**PLANTATION:** Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 days. Sow seeds when there is no risk of ground frost.

**SOIL:** cool, moist, water soaked

**CULTURALS PRACTICES:** Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
