W.H.PERRON

Our natural heritage for your garden "Les semences Marie-Victorin"

LATIN NAME	COMMON NAME	ZONE	SOIL	EXPOSITION	BLOOMING							SOWING METHOD
					APRIL	MAY	JUNE	JULY	AUG.	SEPT.	OCT.	
TREES ANS SHRUBS												
Acer saccharum	Sugar Maple	3	cool	☀◐☼	✿							2
Betula populifolia	Old field burch	1	Cool or dry	☼	✿	✿						6
Juglans nigra	Black walnut	3	cool	◐☼	✿							11
Picea mariana	Black spruce	1a	moist	☼								2
Quercus rubra	Red Oak	3	cool or moist	☼	✿							11
Aronia melanocarpa	Black Chokeberry	2	cool or moist or water soaked	☼		✿	✿					2
Cephalanthus occidentalis	Button-bush	4	moist or water soaked	☀◐☼				✿	✿			2
Cornus alternifolia	Alternate-leaved Dogwood	3	cool or moist	◐		✿	✿					9
Cornus stolonifera	Red-osier Dogwood	1	cool or dry	◐☼			✿					9
Hamamelis virginiana	Witch Hazel	4b	cool or moist	◐☼						✿	✿	7
Ilex verticillata	Winterberry	3	cool or moist or water soaked	◐☼		✿	✿					2
Physocarpus opulifolius	Nine-bark	4	cool or dry	☀◐☼		✿	✿					6
Prunus virginiana	Choke Cherry	2	cool or dry	☼		✿						7
Rhus typhina	Vinegar-tree	3	cool or dry	☼			✿	✿				13
Sambucus canadensis	Canadian Elder	3	cool	☀◐☼			✿					9
Viburnum trilobum	Cranberry-tree	2	cool	☀◐☼			✿					9
GRASSES												
Calamagrostis canadensis	Canada Reed-grass	3	cool or moist	☼				✿	✿			2
Hierochloe odorata	Vanilla Grass	3	cool	☼				✿	✿			4
Juncus effusus	Commun Rush	3	moist or water soaked	☼			✿	✿	✿			8
Scirpus atrovirens	Blackish Bulrush	3	moist or water soaked	☼				✿	✿	✿		8
Spartina pectinata	Pectinate Spartina	3	cool or moist	☼				✿	✿	✿		6
CLIMBING												
Celastrus scandens	Climbing Bittersweet	4	cool	☀◐☼			✿	✿				10
Clematis virginiana	Virginia Virgin's Bower	3	cool	☀◐☼				✿	✿	✿		6
Parthenocissus quinquefolia	Virginia Creeper	2	cool	☀◐☼								6
Vitis riparia	Wild Grape	2	cool, moist or dry	☀◐☼				✿	✿			6
Asclepias incarnata	Swamp Milkweed	3	cool or moist or water soaked	◐☼					✿	✿		5
VIVACES												
Anaphalis margaritacea	Life-everlasting	3	dry	☼					✿	✿	✿	8
Aquilegia canadensis	Gants de Notre-Dame	3	cool, moist	☀◐☼		✿	✿					8

LATIN NAME	COMMON NAME	ZONE	SOIL	EXPOSITION	BLOOMING							SOWING METHOD
					APRIL	MAY	JUNE	JULY	AUG.	SEPT.	OCT.	
Asclepias syriaca	Common milkweed	2	cool, dry	☼				✿	✿	✿		5
Aster novae-angliae	New England Aster	3	cool, dry	☼					✿	✿	✿	1
Chelone glabra	Snakehead	3	cool, moist or water soaked	◐				✿	✿	✿	✿	7
Epilobium angustifolium	Firewood	2	cool, dry	☼				✿	✿	✿		7
Heliopsis helianthoides	False Sunflower	4	cool	☼				✿	✿			2
Hypericum pyramidatum	Giant St.John'swort	4	cool, moist	☼				✿	✿			8
Iris versicolor	Larger Blue-Flag	2	cool, moist, water soaked	◐			✿	✿				13
Lathyrus maritimus	Beach Pea	3	dry	☼				✿	✿	✿	✿	10
Lilium canadense	Wild Yellow Lily	4	cool or moist	◐			✿	✿				1
Monarda fistulosa	Wild Bergamot	4	cool	☼				✿	✿			3
Oenothera victorinii	Victorin's Evening Primrose	2	cool or dry	☼			✿	✿	✿	✿		1
Phytolacca americana	Pokeweed	5	cool or moist	☼			✿	✿				12
Solidago canadensis	Canada Goldenrod	3	cool or dry	☼				✿	✿	✿		6
Verbena hastata	Blue Vervein	4	cool, moist or water soaked	◐				✿	✿	✿		8
Zizia aurea	Golden meadowparsnip	3	cool, moist or water soaked	◐		✿	✿					2

1) No pre-treatment necessary. Sow seeds when there is no risk of ground frost.
2) No pre-treatment necessary. Sow seeds when there is no risk of ground frost. Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
3) No pre-treatment necessary. Sow seeds when there is no risk of ground frost. Sow seeds on the surface without covering after sowing. These seeds are very small and need light to germinate. Seeds can be mixed with fine sand or talcum for a uniform sowing.
4) Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 days. Sow seeds when there is no risk of ground frost.
5) Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 days. Sow seeds when there is no risk of ground frost. Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
6) Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 to 90 days. Sow seeds wherever desired as soon as the soil gets warm enough. Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.

7) Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 90 days. Sow seeds when there is no risk of ground frost. Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
8) Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 to 90 days. Sow seeds when there is no risk of ground frost. Sow seeds on the surface without covering after sowing. These seeds are very small and need light to germinate. Seeds can be mixed with fine sand or talcum for a uniform sowing.
9) Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 90 days. Sow seeds when there is no risk of ground frost. Or plant the seeds outdoors during the fall. Germination will occur after 2 winter periods (18 to 20 months).
10) Bring water to a boil for 5 minutes. Pour over seeds and let soak for 24 hours. Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 90 days. Sow seeds when there is no risk of ground frost. Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
11) Do not allow the seeds to dry. Bring water to a boil for 5 minutes. Pour over seeds and let soak for 24-48 hours. Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 to 90 days. Sow seeds when there is no risk of ground frost. Or plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
12) Lightly abrade the seed coats by rubbing seeds between two sheets of sandpaper. Bring water to a boil for 5 minutes. Pour over seeds and let soak for 24 hours. Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 30 days. Sow seeds when there is no risk of ground frost. Or, plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
13) Lightly abrade the seed coats by rubbing seeds between two sheets of sandpaper. Bring water to a boil for 5 minutes. Pour over seeds and let soak for 24 hours. Mix seeds with an equal amount of damp sand or vermiculite. Place the mixture in a sealed plastic bag. Store the bag in a refrigerator or cool storage room for 90 days. Sow seeds when there is no risk of ground frost. Or, plant the seeds outdoors during the fall. Germination will occur the following spring or later on.
