

LIGHT STAND

HOW TO USE WITH TSHO & LED STRIP LIGHTS

06-1045-010

The Universal Light stand from SunBlaster lighting is designed to hold any size TSHO or LED strip light securely above your plants. The universal design allows any height from zero to 40 cm above the plant canopy to be achieved using the included bars, or for more height, the Universal Light Stand accommodates standard 3/4" square metal tubing, available from most hardware stores.

LIGHT NOT INCLUDED

- 1) Position your light and light grip on a flat surface parallel to each other
- 2) Place the raised edge of the light onto the bottom side of the light grip
- 3) Push down firmly on the top side of the light until the light snaps into place
- 4) Repeat for the opposite side of the light grip
