

GROWER'S FACTS

W.H.PERRON 

O RIENTAL VEGETABLES

Typical oriental varieties, appearance and texture of spinach.

Plant of 10 cm to 25 cm tall, dark green and rich in vitamins. Usually thick, oval-shaped leaves to lengthen. The majority of varieties have a compact to ultra-compact habit as well as extra rapid growth. Ideal for small places. The leaves and stems are edible. We offer you two different types: Pak-Choïs and the mini Pak-Choïs.

CULTURAL PRACTICES: is done in early May.

SOIL: rich in organic matter.

SPACING: sow only 1 cm deep, after complete emergence, thin the plants every 15 - 20 cm in all directions.

GROWING TIPS: it can be grown in summer or in dry conditions and tolerates heat and cold well. Undemanding culture.

HARVEST: it is better to cut it with a knife a little above the ground.
