

GROWER'S FACTS

W.H.PERRON 

Pumpkin

CULTURAL PRACTICES: sow a seed directly in the garden when there is no more risk of frost and the soil is warm.

SOIL: rich and well drained.

SPACING: plant four to five seeds 2.5 cm deep in mounds 2 m apart. Thin out to 2 or 3 plants.

GROWING TIPS: pumpkins require fertile soil; add a generous amount of organic matter when sowing. Adequate humidity is required for its cultivation, water slowly and deeply. What would autumn be without the presence of pumpkins in our gardens!

HARVEST: harvest when the pumpkin is dark orange and store in a cool, dry place.
