

# GROWER'S FACTS

W.H.PERRON 

## RADISH WATERMELON

**CULTURAL PRACTICES:** sow radishes at the end of June.

**SOIL:** in aerated and fertile soil.

**SPACING:** Sow them in rows spaced 60 cm apart and thin them out to 10 to 15 cm.

**GROWING TIPS:** maintaining humidity is important because they will grow fast and taste better.

**HARVEST:** fall harvest 6 to 8 cm in diameter. This winter radish will keep for three to four months in the refrigerator, in a perforated plastic bag.
