

GROWER'S FACTS

W.H.PERRON 

S OYA

CULTURAL PRACTICES: sow in the garden in full sun when the soil temperature is around 15 ° C to 20 ° C.

SOIL: it requires a well-drained soil, with a pH around 6-6.5. It grows best with a tutor.

SPACING: space the plants 10 cm apart in rows 30 cm apart..

GROWING TIPS: tolerates heat and drought well. No need to fertilize them. Since all pods ripen at the same time, make successive seedlings every week or every two weeks for a continuous harvest throughout the summer.

HARVEST: harvest when the pods are still green and turgid.
